ABOUT ME

A highly driven, self-taught Workflow Automation Specialist with a strong foundation in customer operations. I specialize in identifying workflow bottlenecks and transforming manual tasks into high-speed automated systems using Python and Google Apps Script, recently reducing operational time by up to 80%.

Driven by a relentless curiosity, I am currently architecting "IqwanEngine"—an AI-integrated algorithmic trading system. I am eager to bring my problem-solving skills, operational insights, and deep passion for technology to a forward-thinking team. My goal is simple: to build scalable solutions, deliver impactful results, and continuously grow alongside industry experts.

TECHNICAL STACK

Programming & Scripting:

- Python 3 (Advanced Automation)
- Google Apps Script (Custom Dashboards)
- SQL (Database Querying)
- Markdown (Technical Documentation)

AI & API Integration:

- Gemini LLM API (Prompt Engineering & Sentiment)
- MetaTrader 5 (MT5) API
- RESTful API Integration

Automation & System Architecture:

- Algorithmic Trading Logic (XAUUSD)
- Real-time Data Processing & Logging
- Web Framework & Storage (Flask & SQLite)

Development Tools & Version Control:

- Git & GitHub Repository Management
- Zed Editor (High-Performance Development)
- Google Workspace & Google Sites Deployment
- Enterprise Ecosystem: Microsoft 365 (Excel, Word)

SKILLS

- Python & AI Integration
- Workflow Automation
- Google Apps Script
- System Design & Analytics
- Technical Troubleshooting
- Client Issue Resolution
- Operational Efficiency
- User-Centric Support

EXPERIENCE

2023 – Present — **CUSTOMER OPERATIONS & AUTOMATION SPECIALIST**
CONCENTRIX CX MALAYSIA

- Provided high-quality frontline customer support and issue resolution, utilizing ground-level operations to identify manual workflow bottlenecks.
- Engineered a centralized KB portal via Google Sites, reducing information retrieval time by 80% for the entire operations team.
- Developed real-time DSAT detection scripts (Python/App Script), cutting manual ticketing from minutes to seconds.
- Built custom WFM dashboards to fully automate shift tracking for Team Leaders.

2022 – 2023 — **DIRECTOR OF OPERATIONS**
ALPHA ENGINEERING

- Managed business operations, financial tracking, and resource allocation for Telco (TM) projects.
- Demonstrated leadership in restructuring management workflows and optimizing business logic.

2019 – 2022 — **ACCOUNT MANAGER (FINANCIAL MARKETS)**
REKA ADVISORY SDN BHD

- Managed client portfolios and analyzed financial market trends.
- Gained deep exposure to market dynamics, which provided the foundational trading logic and strategy for the development of IqwanEngine.

2015 – 2019 — **SYSTEM OPERATIONS & CLIENT RELATIONS**
MAXIS & VARIOUS TRAVEL AGENCIES

- Handled complex Global Distribution Systems (GDS) like Galileo and Amadeus for high-volume data processing and reservations.
- Developed strong communication and client problem-solving skills.

EDUCATION

2016 — **DIPLOMA IN HOSPITALITY MANAGEMENT**
MALAYSIAN ACADEMIC AND SKILL ADVANCEMENT

- Major: Hospitality Management & Tourism.
- Gained strong foundations in operations management and client relations, which currently supports my user-centric approach in system automation and UI/UX design.
